

Choose your ideal right tech partner with this checklist

Factors	Reason	Pro-Tip
Minimise wait times	Turns chokepoints into checkpoints	Flexible authentication methods for authorized persons.
Enable policy-based automation workflows	Streamline access control process	Manage complex permissions and grant access flexibly
Works with your existing PACS	Cost-effective implementation	Start small for faster go-live and better Rol
Multi-location cloud-based access management	Seamless connectivity	Host the entire solution on the cloud
Innovative digital access	Enhance checkpoints experiences	Use time-saving flexible authentication
Real-time occupancy data	Make data-driven decisions	Map employee insights for space utilization
Seamless Third-Party Integration	Utilize existing systems better	Integrate with core and new-age systems
Enterprise-Grade Encryption and Security	Top-class data privacy	Safeguard information with data encryption
